

Enable Comprehensive Mobile Security with Appthority & AirWatch

Secure your enterprise data and employee privacy from mobile threats.

MOBILE SIGNIFICANTLY EXPANDS ENTERPRISE DATA RISK

Mobile security is a growing challenge as mobile use in enterprises explodes. In your mobile enterprise, thousands of employees interact and share critical data across an ever-changing landscape of devices, apps and data networks.

Your VMware AirWatch EMM instance helps you manage provisioning and devices. But for effective, enterprise-grade mobile security, you also need real-time intelligence about mobile threats and an efficient, automated, and integrated way to remove those threats from your enterprise.

APPTHORITY MOBILE THREAT PROTECTION (MTP)

COMPREHENSIVE MOBILE THREAT PROTECTION OPTIMIZED FOR YOUR ENTERPRISE NEEDS ACROSS MOBILE DEVICES, APPS AND NETWORKS.

Appthority MTP is a comprehensive mobile security system that combines cloud-scalable global protection, next-generation threat analytics, and industry leading mobile threat management capabilities.

Appthority MTP is the most complete answer to your enterprise mobile security needs. The advanced and flexible integration with the AirWatch Cloud or on-premise solution delivers on the Gartner recommendation to use a mobile threat defense (MTD) solution for security and your EMM as a point of orchestration and for policy enforcement.

Appthority MTP empowers your enterprise mobility and security teams with powerful workflows that include proactive automation to identify and eliminate potential threats before they become high risk incidents or breaches. Should mobile threats enter your environment, Appthority MTP also includes automated response and threat remediation capabilities to actively remove those threats in the shortest time possible.

MANAGE MOBILE RISK AS YOU MANAGE MOBILITY

Appthority recognizes and extends your investment in the VMware AirWatch device management capabilities. Through the bi-directional integration the two systems work together for:

- Continuous Threat Protection
- Automated Mobile Threat Detection Prevention & Remediation
- Actionable Threat Intelligence
- Tailored Risk Policies
- Real-time Education & Self-Remediation
- Enhanced Data Security & Privacy

Add Appthority MTP to your VMware AirWatch instance and get the power to:

- Detect mobile threats in real-time across all of your mobile users.
- Use active threat intelligence to target specific devices for remediation and compliance actions.
- Leverage the Appthority MTP Mobile App for on-device protection and direct threat remediation with the mobile user.

“Emerging mobile threats are now a CISO-level concern. Appthority is THE solution for managing those threats.”

– CISO, Scotiabank

Prevent, Detect, and Remediate Mobile Threats

KEY DEPLOYMENT & SECURITY FEATURES

Appthority MTP includes a range of integration features that leverage the unique capabilities of your VMware AirWatch EMM instance. These include:

1. VMware AirWatch Appscan Support

Appthority MTP synchronizes its mobile threat compliance policies directly with VMware AirWatch so that you can create and assign powerful VMware AirWatch-powered remediation policies aligned to Appthority-managed mobile threat policies.

2. High Risk Mobile Threat Escalation

Any high risk mobile threat detected by Appthority MTP is prioritized for immediate synchronization with VMware AirWatch to enable immediate remediation and compliance enforcement actions.

3. On-Device Threat Detection & Employee Protection

The Appthority MTP Mobile App (for iOS & Android) provides a complete threat protection solution for employee devices. The MTP Mobile App detects new threats as they are introduced to a mobile device, giving real-time mobile threat protection. The MTP Mobile App can suggest remediation steps directly to the employee and can escalate newly detected threat information to VMware AirWatch for additional compliance actions.

4. Flexible Integration Deployment Options

The Appthority MTP EMM Connector makes integration simple and straightforward for your cloud or on-premises deployment of VMware AirWatch. Since the EMM Connector is packaged as a separate, stand alone integration module (VM Appliance or a Docker container image), it can be automatically deployed in the Appthority MTP Cloud or downloaded for deployment in your datacenter virtual host infrastructure.

About Appthority

Appthority is a pioneer in enterprise mobile security and a leader in the Mobile Threat Defense category. Our comprehensive mobile threat protection solution helps customers keep their data private and secure from mobile device, app and network threats. More Fortune 1000 enterprises trust Appthority than any other mobile security provider.
