# Enable Comprehensive Mobile Security with Appthority & MobileIron

Secure your enterprise data and employee privacy from mobile threats.

**MobileIron**

## MOBILE SIGNIFICANTLY EXPANDS ENTERPRISE DATA RISK

Mobile security is a growing challenge as thousands of employees interact and share critical data across an ever-changing landscape of devices, apps and data networks.

Your MobileIron EMM instance helps you manage provisioning and devices. But for effective, enterprise-grade mobile threat protection, you also need real-time intelligence about mobile threats and an efficient, automated, and integrated way to remove those threats from your enterprise

## ADD APPTHORITY MOBILE THREAT PROTECTION

**COMPREHENSIVE MOBILE THREAT PROTECTION OPTIMIZED FOR YOUR ENTERPRISE NEEDS ACROSS MOBILE DEVICES, APPS AND NETWORKS.**

Appthority MTP identifies a broad range of potential security risks — from operating system vulnerabilities to app malware to Man-in-the-Middle attacks — to ensure complete mobile threat protection.

Appthority was born mobile for the enterprise so our MTP solution delivers cloud-scalable global protection, next-generation threat analytics, and industry-leading mobile threat management capabilities for IT security and mobility teams.

Enhance your existing security systems with real-time threat intelligence shared via Appthority MTP's smart workflows and EMM and SIEM connectors. The optional on-device MTP Mobile App enables device and network threat detection to provide iOS and Android endpoint protection for all your mobile users.

## MANAGE MOBILE RISK AS YOU MANAGE MOBILITY

MobileIron gives you the tools to manage devices and enforce compliance. The Appthority MTP EMM Connector seamlessly integrates with MobileIron to share real-time threat intelligence and associated device and app compliance policies, enabling targeted device remediation via your MobileIron instance. You can also customize mobile device and app policies for your unique requirements. The advanced integration between Appthority and MobileIron gives you the ability to defend your mobile environment more effectively across devices, apps and networks.

**MobileIron Tech Alliance PARTNER**

**Add Appthority MTP to your MobileIron instance and get the power to:**

- Detect mobile threats in real-time across all of your mobile users.

- Use active threat intelligence to target specific devices for remediation and compliance actions.

- Leverage the Appthority MTP Mobile App for on-device protection and direct threat remediation with the mobile user.
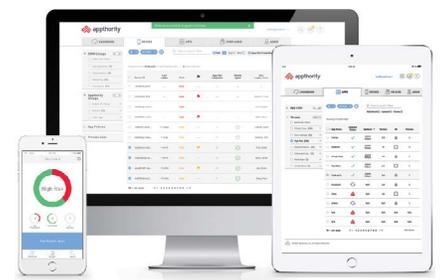

*"Emerging mobile threats are now a CISO-level concern. Appthority is THE solution for managing those threats."*

~ CISO, Scotiabank

## Prevent, Detect, and Remediate Mobile Threats
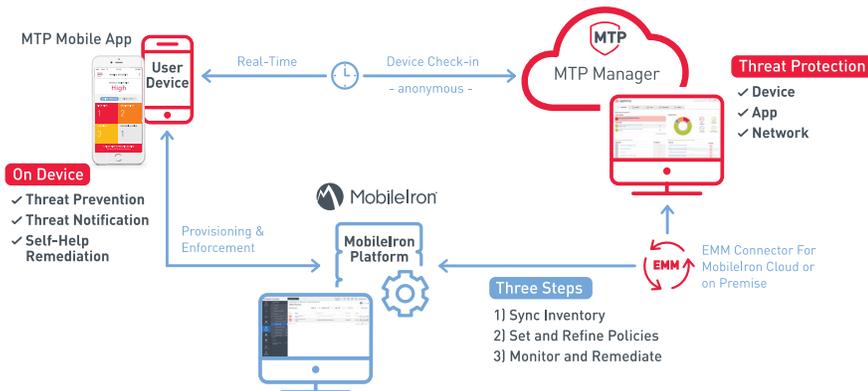

# KEY DEPLOYMENT & SECURITY FEATURES

1. **Flexible Integration Options**
   Appthority MTP integrates with either MobileIron Cloud or Core (on-premise) product versions. Appthority's EMM Connector for MobileIron streamlines integration setup and allows flexible Connector deployment either in the Cloud or inside your datacenter as a virtual appliance.

2. **Device and App Policy Sync**
   Appthority mobile threat policies are synchronized to your MobileIron instance so that threat remediation actions can be set up in your MobileIron console using Appthority policy information.

3. **App Risk Scoring Integration**
   Appthority assigns a risk score to each mobile app in your enterprise based on how it complies with your overall compliance policies. App risk scores are synchronized to MobileIron for use in setting up device-level remediation policy.

4. **Advanced Remediation Policies**
   With Appthority's real-time threat intelligence integrated into your MobileIron instance, you can use MobileIron's Advanced Policies features to set up remediation action chains incorporating the severity of the threat and which device or employee communication actions to take.

5. **High Risk Threat Event Escalation**
   When Appthority MTP detects high risk mobile threats in your environment, it automatically escalates those threats to your MobileIron instance for priority remediation.

6. **Remediation Policy Escalation**
   Appthority's MTP Mobile Agent delivers on-device protection and can attempt to remediate threats directly. If unsuccessful, device-level threat information can be escalated to MobileIron for more aggressive remediation action.

7. **Blacklist and Whitelist Workflows**
   Appthority MTP provides master blacklists and whitelists that override any specific compliance policy. Blacklisted apps are automatically designated non-compliant regardless of a specific threat assessment outcome. Similarly, whitelisted apps are approved regardless of any policy violation. Appthority MTP respects blacklists and whitelists when passing information to MobileIron, ensuring the correct enforcement actions are taken.

## ABOUT APPTHORITY

Appthority is a pioneer in enterprise mobile security and a leader in the Mobile Threat Defense category. Our comprehensive Mobile Threat Protection solution helps customers keep their data private and secure from mobile device, app and network threats. More Fortune 1000 enterprises trust Appthority than any other mobile security provider.
